Investment Objectives, Focus & Approach

The investment objective, focus and approach of the underlying Amundi Islamic BRIC Quant are described under “Investment policy and objectives” of “Appendix I: Main Characteristics of the Sub-Funds” in the Amundi Islamic Prospectus.

Risks

Please refer to Section V – “Risk Factors” and respective sub-fund sections in “Appendix I: Main Characteristics of the Sub-Funds” on “Risk Warning” and “Risk Profile” in the Amundi Islamic Funds Prospectus for details on risk factors specific to the Underlying Fund. The risks may include:

Exchange Risk

The Underlying Fund may be invested, according to variable proportions and limits, in values and instruments expressed in other currencies than the base currency of the Underlying Fund and, consequently, may lead to be exposed to a variation of the exchange rates. Credit Risk It refers to the risk that the issuer of fixed-income securities held by the Underlying Fund may default on its obligation and the Underlying Fund will not recover its investment. Management and Investment Strategy Risk Underlying Funds may seek to generate performance by making forecasts on the evolution of certain markets compared to others through the arbitrage strategies. These anticipations can be erroneous and cause a performance lower than the objective of management.

Credit Risk

It refers to the risk that the issuer of fixed-income securities held by the Underlying Fund may default on its obligation and the Underlying Fund will not recover its investment.

Management and Investment Strategy Risk

The Underlying Fund may seek to generate performance by making forecasts on the evolution of certain markets compared to others through the arbitrage strategies. These anticipations can be erroneous and cause a performance lower than the objective of management.

Liquidity Risk

Notably due to unusual market conditions or unusually high volume of repurchase requests, the Underlying Fund might encounter difficulties to pay repurchase proceeds within the time period stated in the Prospectus.

Market Risk

Value of the Underlying Fund investments could decrease due to movements in financial markets.

Risk of Small and Medium Companies

Investment in smaller and medium companies offers the possibility of higher returns but may also involve a higher degree of risk, due to higher risks of failure or bankruptcy and due to a more reduced volume of quoted securities and to the accentuated movements that it implies.

Developing Countries Risk

Investments in securities of Issuers of Developing Countries involve special considerations and risks, including the risks associated with international investing generally, such as currency fluctuations, the risks of investing in countries with smaller capital markets, limited liquidity, price volatility, different conditions applying to 15 transaction and control and restrictions on foreign investment, as well as risks associated with Developing Countries economies, including high inflation and interest rates, large amounts of external debt and political and social uncertainties.

Volatility Risk

The Underlying Fund may be exposed to the risk of volatility of the equity markets and could thus be subject to strong movements within the limit of the target Value at Risk. A strong movement of the volatility of the equity markets could negatively impact the performance of the Underlying Fund according to its investment objective. Volatility means a statistical measure of the dispersion of returns for a given security. In practice, volatility is measured by calculating the annualized standard deviation of daily change in price.

Interest Rate Risk

Although Shariah compliant investments are not based on and related to interest, the Net Asset Value of the Underlying Fund will be affected depending on fluctuations in interest rates. When interest rates decline, indeed, the market value of fixed-income securities tends to increase, and conversely. A rise in interest rates would have for consequences a depreciation of the Underlying Fund's investments.

Risks attached to transactions into derivatives

The Underlying Fund may engage in various strategies in view of reducing certain risks and/or attempting to enhance return. The strategies may include the use of derivatives instruments such as options, warrants, swaps a/o futures. Such strategies might be unsuccessful and incur losses for the Underlying Fund, due to market conditions. Derivatives also involve additional specific risks

such as the risk of mispricing or improper valuation of derivatives and the risk that derivatives may not correlate perfectly with underlying assets, interest rates and indices.
