KEY FEATURES OF THE SUB-FUND

WHAT ARE YOU INVESTING IN?

You are investing in an ILP Sub-Fund that feeds 100% into the Underlying Fund, a unit trust constituted in Singapore that aims to achieve long term capital appreciation through investment directly or indirectly in quoted equities, bonds and other fixed income securities in global markets. The Underlying Fund will invest in multiple asset classes and will be comprised of an actively managed basket of equities, fixed income, property and commodities related securities.

It is the Manager’s present intention to invest the assets of the Underlying Fund into various sub-funds of the Schroder International Selection Fund (the “Schroder ISF”) and other collective investment schemes and exchange traded funds (collectively known as “Funds of the Underlying Fund”).

Refer to the “Important Information” section and Paragraphs 6.1 and 16.4 of the Underlying Fund’s Prospectus for further information on features of the Sub-Fund.

¹ For ILP sub-funds that feed 100% into an underlying CIS fund, some of the information provided below could be similar to the underlying CIS fund.

² In order for units in the ILP sub-fund to be classified as Excluded Investment Products, the investment objectives and investment focus of the ILP sub-fund, and investment approach of the manager have to be stated in the product summary:

- (a) to invest only in deposits or other Excluded Investment Products; and
 (b) not to engage in securities lending or repurchase transactions for the ILP sub-fund.

The definition of “Excluded Investment Product” can be found in Annex 1 to the Notice on Recommendations on Investment Products [Notice No. FAA-N16] at <http://www.mas.gov.sg/Regulations-and-Financial-Stability/Regulations-Guidance-and-Licensing/Financial-Advisers/Notices.aspx>.

<p>The Schroder ISF sub-funds may invest in financial derivative instruments for purposes other than hedging and/or efficient portfolio management in accordance with the Schroder ISF's Luxembourg prospectus and applicable laws in Luxembourg.</p>	
Investment Strategy	
<p>The Manager adopts an active management approach that is focused on creating a truly diversified investment portfolio outcome for the Underlying Fund's investors.</p> <p>Unlike traditional balanced funds that simply focus on tactically allocating between defensive and growth assets, depending on the risk profile of the Underlying Fund and the Manager's relative view of such asset classes, the Manager recognises that between defensive assets and growth assets, there are a range of assets that can contribute to a combination of better returns and lower risk in a portfolio. These asset classes warrant consideration.</p> <p>Additionally, the Manager recognises that over time, traditional defensive and growth asset classes may behave in a similar fashion and therefore may not always provide investors with a diversified portfolio outcome. By considering a broad range of asset classes, sub-asset classes and investment styles, the Manager attempts to increase the probability of achieving the investment objective in a consistent manner, over the long term.</p>	<p>Refer to Paragraph 6.2 of the Underlying Fund's Prospectus for further information on the investment strategy of the Sub-Fund.</p>
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> • The Manager of the Underlying Fund is Schroder Investment Management (Singapore) Ltd. • The Trustee of the Underlying Fund is HSBC Institutional Trust Services (Singapore) Limited. • The custodian of the Underlying Fund is The Hongkong and Shanghai Banking Corporation Limited. • The registrar of the Underlying Fund is Schroder Investment Management (Luxembourg) S.A.. 	<p>Refer to Paragraphs 2, 3 and 4 of the Underlying Fund's Prospectus for further information on the role and responsibilities of these entities.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of the Underlying Fund and its distributions (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment.</p>	<p>Refer to Paragraph 9 of the Underlying Fund's Prospectus for further information on risks of the Sub-Fund.</p>
Market and Credit Risks	
<p>You are exposed to market risk.</p> <p>The value of investments by the Underlying Fund may go up and down due to changing economic, political or market conditions, or due to an issuer's individual situation.</p> <p>You are exposed to credit risk.</p> <p>The Underlying Fund is subject to the risk that some issuers of debt securities and other investments made by the Underlying Fund, including counterparties to swap transactions, may not make payments on such obligations, or an issuer (or counterparty) may suffer adverse changes in its financial condition that could lower the credit quality of a security, leading to greater volatility in the price of the security and in the value of the Underlying Fund.</p>	<p>Refer to Paragraphs 9.2(a) and 9.2(d) of the Underlying Fund's Prospectus for further information.</p>
Liquidity Risks	
<p>The ILP Sub-Fund is not listed and you can redeem only on Business Days.</p> <p>There is no secondary market for the ILP Sub-Fund. All realisation requests should be submitted to Aviva Ltd.</p>	<p>Refer to the "Important Information" section and paragraph 12.1 of the Underlying Fund's Prospectus for further information.</p>

Product-Specific Risks

<p>You are exposed to equity risk. The Underlying Fund may invest in stocks and other equity securities and their derivatives which are subject to market risks that historically have resulted in greater price volatility than that experienced by bonds and other fixed income securities. The Underlying Fund may also invest in convertible instruments which may be converted into equity. A convertible instrument tends to yield a fairly stable return before conversion but its price usually has a greater volatility than that of the underlying equity.</p> <p>You are exposed to interest rate risk. Investments in bonds, debentures, loan stocks, convertibles and other debt instruments may decline in value if interest rates change. In general, the price or value of existing debt arises when interest rates fall, and falls when interest rates rise. Interest rate risk is generally greater for investments with long durations or maturities.</p> <p>You are exposed to emerging market and frontier risk. Emerging markets, and especially frontier markets, generally carry greater political, legal counterparty and operational risk.</p> <p>You are exposed to financial derivatives risk. The Underlying Fund may use financial derivatives. The use of futures, options, warrants, forwards, swaps or swap options involves increased risks. The Underlying Fund's ability to use such derivatives successfully depends on the Manager's ability to accurately predict movements in stock prices, interest rates, currency exchange rates or other economic factors and the availability of liquid markets. If the Manager's predictions are wrong, or if the derivatives do not work as anticipated, the Underlying Fund could suffer greater losses than if the Underlying Fund had not used the derivatives.</p>	<p>Refer to Paragraph 9.2(b), 9.2(c), 9.2(f), 9.2(h) and 9.3 of the Underlying Fund's Prospectus for further information.</p>
