KEY FEATURES OF THE SUB-FUND

<p>WHAT ARE YOU INVESTING IN?</p> <p>You are investing in an ILP Sub-Fund that feeds 100% into the Underlying Fund, a unit trust constituted in Singapore that aims to achieve long term capital growth primarily through investing in securities of companies quoted on some or all of the stock markets in countries in Asia (including Australia and New Zealand but excluding Japan). The portfolio of the Underlying Fund will be broadly diversified with no specific industry or sectoral emphasis.</p> <p>The Underlying Fund’s Manager is presently offering US\$ Class Units (denominated in US\$) and S\$ Class Units (denominated in S\$) for investment. Both Classes will constitute the Underlying Fund and are not separate sub-funds under the Underlying Fund.</p>	<p>Refer to Paragraph 5 and 6 and Paragraph 21.1 of the Underlying Fund’s Prospectus for further information on features of the Sub-Fund.</p>
---	---

¹ For ILP sub-funds that feed 100% into an underlying CIS fund, some of the information provided below could be similar to the underlying CIS fund.

² In order for units in the ILP sub-fund to be classified as Excluded Investment Products, the investment objectives and investment focus of the ILP sub-fund, and investment approach of the manager have to be stated in the product summary:

- (a) to invest only in deposits or other Excluded Investment Products; and
- (b) not to engage in securities lending or repurchase transactions for the ILP sub-fund.

The definition of “Excluded Investment Product” can be found in Annex 1 to the Notice on Recommendations on Investment Products [Notice No. FAA-N16] at <http://www.mas.gov.sg/Regulations-and-Financial-Stability/Regulations-Guidance-and-Licensing/Financial-Advisers/Notices.aspx>.

Investment Strategy

<p>The investment philosophy of the Manager is founded on the belief that returns over the long term are determined by economic and corporate fundamentals and that the analysis of those factors should be the foundation of the Manager’s investment strategy. Given the lack of comprehensive information flow on Asian ex-Japan equities, the Manager believes its style of active management with emphasis on inhouse fundamental research will add value.</p> <p>The Manager’s approach is to capitalise on the Schroder group’s strong in-house research capability and exploit market inefficiencies.</p> <p>Over the longer term, the Manager believes that share prices should reflect the ability of companies to create value for shareholders. As such, the distinctive focus of its research is to identify companies that have robust business models, good corporate governance and strong management teams to drive shareholder returns.</p> <p>The net asset value (“NAV”) of the Underlying Fund is likely to have a high volatility due to its investment policies or portfolio management techniques.</p>	<p>Refer to “Important Information” section and Paragraph 6 on the Underlying Fund’s Prospectus for further information on the investment strategy of the Underlying Fund.</p>

Product-Specific Risks

You are exposed to equity risks.

The Underlying Fund may invest in stocks and other equity securities and their derivatives which are subject to market risks that historically have resulted in greater price volatility than that experienced by bonds and other fixed income securities.

You are exposed to foreign securities risks.

Investments in securities throughout the world are subject to numerous risks resulting from market and currency fluctuations, future adverse political and economic developments, the possible imposition of restrictions on the repatriation of currency or other governmental laws or restrictions, reduced availability of public information concerning issuers and the lack of uniform accounting, auditing and financial reporting standards or of other regulatory practices and requirements comparable to those applicable to companies in the investor's domicile. In addition, securities of companies or governments of some countries may be illiquid and their prices volatile and, with respect to certain countries, the possibility exists of expropriation, nationalisation, exchange control restrictions, confiscatory taxation and limitations on the use or removal of funds, or other assets, including withholding of dividends.

You are exposed to derivatives risks.

The Underlying Fund may use or invest in financial derivatives. The use of futures, options, warrants, forwards, swaps or swap options involves increased risks. The Underlying Fund's ability to use such derivatives successfully depends on the Manager's ability to accurately predict movements in stock prices, interest rates, currency exchange rates or other economic factors and the availability of liquid markets. If the Manager's predictions are wrong, or if the derivatives do not work as anticipated, the Underlying Fund could suffer greater losses than if the Underlying Fund had not used the derivatives.

You are exposed to risks associated with the Stock Connect.

The Underlying Fund may invest in A-Shares of PRC companies directly via the Stock Connect (as further described in section (A) of the Annex to the Prospectus). The Stock Connect is a programme novel in nature. The relevant regulations are untested in any judicial precedent and subject to change. The programme is subject to quota limitations which may restrict the Underlying Fund's ability to invest in A-Shares through the programme on a timely basis. Where a suspension in the trading through the Stock Connect is effected, the Fundthe Fund. Where a suspension in the trading through the Stock Connect is effected, the Fse certain restrictions on selling. Hence the Fund may not be able to dispose of holdings of A-Shares in a timely manner. When a stock is recalled from the scope of eligible stocks for trading via the Stock Connect, the stock can only be sold but restricted from being bought. Due to the differences in trading days, the Fund may be subject to a risk of price fluctuations in A-Shares on a day that the PRC market is open for trading but the Hong Kong market is closed.

Although the relevant PRC rules and regulation generally recognise the Hong Kong and overseas investors (including the Fund) as the "ultimate owners" of the rights and interests of A-Shares traded via the Stock Connect, how an investor such as the Fund, as the beneficial owner of the A-Shares, under the Stock Connect structure, exercises and enforces its rights over its holdings in the PRC courts are to be tested.

Trading in securities through the Stock Connect is subject to clearing and settlement risk. If ChinaClear defaults, the Fund may suffer delays in the recovery process or may not be able to fully recover its losses from ChinaClear. Further, the Fund's investments through the Stock Connect are not covered by Hong Kong's Investor Compensation Fund.

The Stock Connect requires the development of new information technology systems on the part of the SEHK and exchange participants and is subject to operational risk. If the relevant systems fail to function properly, trading in both Hong Kong and Shanghai markets through the

the cut-off time by giving you thirty (30) days' prior notice or any such shorter period of notice as Aviva Ltd may agree with the relevant authorities.

- The Withdrawal Amount you will receive as part of a subsequent withdrawal is illustrated as follows:

Assuming: Policy term of 10 years and the Policyholder wishes to exit in Year 5; Initial Units withdrawn = 10,000; Unit price = S\$2; Exit Fee applicable in Year 5 is S\$6,950.

Withdrawal Amount = 10,000 X S\$2 = S\$20,000

Amount payable to You = S\$20,000 – S\$6,950 = S\$13,050
